MATHEMATICS

Draw a colorful bar graph for the IPL 2025 based on team performance.

- a) Which team are you supporting?
- b) Which position did your favourite team achieve?

SCIENCE

Growing Beautiful Crystals at Home

Grow stunning crystals by creating a saturated solution and allowing it to cool and crystallize over time.

Materials Needed:

- Salt / Sugar / Alum / Copper Sulphate
- Hot Water
- A Glass Jar
- A Spoon
- A String and a Pencil

Procedure:

1. Heat water and gradually dissolve salt until no more can dissolve, creating a saturated solution.
2. Tie one end of a string to a pencil and place it over the jar, ensuring the string hangs freely in the liquid.
3. Set the jar in a quiet location and leave it undisturbed.
4. After a few days, observe the formation of beautiful crystals on the string.
5. Repeat the experiment using sugar or alum at different temperatures to compare crystal growth.
